

BPN-TRACK

World's 1st 100ml Diesel Theft Detection

Our system detects even the smallest diesel theft of 100ML, making it the most accurate system available. No other competitor can match this precision.

BPN-TRACK

Introduction :

BPNTTRACK is a leading provider of Diesel Monitoring GPS Systems. We help businesses manage fuel consumption and track vehicle locations with precise, real-time data to prevent fuel theft and reduce costs.

Diesel Monitoring :

Diesel theft and wastage are common in businesses relying on heavy vehicles like trucks, cranes, and JCBs, Drilling Compressors, . Our system ensures full control over fuel usage, reducing losses by up to 20-30% annually.

Our Promise :

We offer reliable, easy-to-use technology, excellent customer service, and substantial fuel savings.

BPN-TRACK

Basic Explanation

The Diesel Monitoring GPS System tracks both the fuel level in your vehicle's tank and its real-time location. This system helps businesses monitor fuel usage and prevent theft while keeping track of vehicle movements.

How it works

Once installed in your vehicle, the system continuously tracks diesel levels and vehicle location. All this data is accessible on your phone, tablet, or computer through our app, allowing you to monitor everything in real-time.

Major Innovations of BPNTRACK Diesel Monitoring GPS System

4.1 : 100ML Diesel Theft Detection – World's first Innovation

Unmatched Precision :

BPNTRACK is the first company in the world to offer 100ML diesel theft detection. This innovation is the result of over 5 years of dedicated research and development. We've customized the hardware to achieve unparalleled accuracy, ensuring that even the smallest amounts of diesel theft—down to just 100ML—are detected instantly.

How We Achieved It :

Through extensive R&D, we customized the wireless fuel level sensor (Digital Gauge) to offer precise monitoring. Most systems struggle to detect theft below 4-5 liters, but our cutting-edge technology ensures that no theft goes unnoticed, giving you full control over your diesel resources.

Why Is It Revolutionary :

This breakthrough innovation has set a new standard in diesel monitoring. The ability to detect even the smallest theft means you can act immediately, ensuring that no loss is too small to be detected, helping businesses save significantly on fuel costs.

4.2 : 100% Accurate Diesel Refill Alerts – First in the Industry

Custom Hardware for Total Accuracy :

Our 100% accurate diesel refill alerts are another innovation that no other system in the world offers. After 5 years of R&D, we developed and customized our hardware to monitor fuel refills with milliliter-level precision.

How Does This Work :

The system monitors fuel levels before and after refueling, calculating the exact amount added. Our digital gauge ensures that the amount of diesel refilled matches the billed quantity, offering unmatched accuracy.

Why it's a Game-Changer :

With 100% accurate refill alerts, businesses can eliminate discrepancies between what they pay for and what they receive. This innovation helps prevent losses due to over- or under-reporting, providing full transparency in fuel management.

4.3 : 100% Accurate Odometer Calculation – Accurate to every Centimeter

Unparalleled Accuracy with Continuous GPS Tracking :

BPNTRACK provides 100% accurate odometer readings by

continuously adding GPS points centimeter by centimeter (cm by cm). This ensures that every movement of the vehicle, no matter how small, is tracked in real-time with complete accuracy.

How It Works :

Unlike competitors that measure distance by capturing GPS points at 1-1 minute intervals, which leads to inaccuracies on curvy or winding roads, our system captures every centimeter by continuously adding GPS points. This eliminates the gaps that arise with longer intervals and ensures that all road movements are captured accurately.

Why It's Revolutionary :

Competitors' systems often miss smaller, critical movements—especially on winding roads—because of the gaps between GPS points taken at longer intervals. This results in inaccurate odometer readings. BPNTRACK, with its continuous GPS tracking, ensures precise measurement of every centimeter traveled, offering a true reflection of distance for optimized fleet management.

4.4 : Fiber Tank And Better Performance On Rough Roads

Most systems fail to provide accurate readings in fiber tanks and during fuel sloshing caused by rough terrains or sharp turns, often triggering false alarms. BPNTRACK's advanced sensors are designed to handle these challenges, distinguishing between natural fuel movement and actual fuel loss. Our system ensures precise monitoring even in fiber tanks, where fuel fluctuations are higher, delivering stable and accurate data where others fail.

4.5 : Performance in Tough Terrains

Works in rough terrains, remote areas, and off-road environments where other systems might fail.

4.6 : Airtel & JIO SIM Options

We offer Airtel and JIO SIM options for better network coverage, unlike competitors using Vodafone SIMs, which often have poor reception in many regions in India.

4.7 : Built-in Memory for No-Signal Areas

Stores data when there's no signal and uploads it once connectivity is restored, ensuring no data is lost.

Additional Features of BPNTRACK Diesel Monitoring GPS System

BPN-TRACK

Real-Time Vehicle Tracking :

Track the live location of your vehicles at any time through your phone, tablet, or computer.

1

2

Waterproof & Tamper-Proof Sensors :

Sensors are waterproof and tamper-proof, ensuring they function reliably even in harsh conditions. Any tampering triggers an immediate alert.

1-Year Data History :

Access up to a full year of historical data for diesel usage, routes, and driver behavior, while most competitors offer only 7-30 days of history.

3

4

App Compatibility :

Our app is available on iOS and Android mobile devices, computers, and tablets, offering flexible access to your fleet data anytime, anywhere.

Driver Behavior Analysis :

BPNTRACK's Driver Behavior Analysis monitors key driving behaviors such as sudden acceleration, harsh braking, sharp turns, and over-speeding. The system scores each driver, allowing you to rank performance and identify areas for improvement. This helps reduce fuel consumption, vehicle wear, and improve safety. Real-time alerts notify you of risky behaviors, enabling immediate action. By analyzing driver habits, you can enhance the efficiency, safety, and overall performance of your fleet.

5

Additional Features of BPNTRACK Diesel Monitoring GPS System

Step-by-Step Guide :

1

Pre-Installation :

After booking confirmation, we arrange an installation at your preferred location.

2

On-Site Installation :

The system only requires connecting two wires to the vehicle's battery. Additionally, a wireless fuel level sensor (Digital Gauge) is installed inside the fuel tank to accurately monitor diesel levels. This process ensures precise and real-time fuel tracking. The entire installation typically takes about 1 hour.

3

Tel Napai Process : (Diesel Calibration)

To calibrate the system, the diesel tank is emptied and refilled in 5-liter increments. The owner needs to arrange labor for the diesel handling process, including emptying and refilling the tank to ensure accurate calibration.

4

Post-Installation Support :

We provide a video recording of the installation for future reference, enabling you to handle minor issues independently.

BPN-TRACK

Benefits of Our GPS 2-Wiring System

Quick Installation :

Only two wires are needed for connection, making installation fast and simple.

Wide Compatibility :

Works with any vehicle and handles voltages from 9-30V, ensuring seamless compatibility without modifications

Low Maintenance :

Minimal wiring reduces the chances of issues, and local garages can easily handle any repairs, keeping downtime to a minimum

Reliable Performance :

Fewer components mean higher durability and long-term reliability.

Why We Stand Out

Competitors' Wired Sensors :

Competitors often use complex wired fuel sensors, requiring clumsy and extensive wiring. This not only complicates installation but also makes it difficult for local garages to maintain or repair, leading to higher maintenance costs and delays

Sensor and GPS: Tamper-Proof, Fireproof, and Built for Safety

Tamper-Proof :

Our sensors and GPS units are designed to detect any unauthorized interference, sending immediate alerts. They're securely installed to prevent tampering.

Fireproof & Explosion-Proof :

Made from fire-resistant materials, the sensors are explosion-proof and safe for use in fuel tanks, preventing any risk of ignition

Durable :

The system is waterproof, dustproof, and shock-resistant, ensuring reliable performance in harsh environments.

BPNT-TRACK

Order Process & Delivery

You can now easily order our Diesel Monitoring GPS System through Amazon for a convenient and risk-free experience. Amazon offers a Return policy : 10 days in amazon and 30 days return policy from company website, allowing you to try the product without worry. Once the order is placed, our team will coordinate with you for installation booking. Additionally, if you prefer, you can also order directly from our website with a 1,000 discount per unit.

Pricing

One-time Cost : 35,000rs. for the device, including 1-year subscription, installation, and hardware warranty.

Annual Renewal : 8,000rs. per year after the first year.

Customer Support

Our support team is available Monday to Saturday, from 11 AM to 6 PM. We are always ready to assist with any questions or technical issues you may have.

Hardware Warranty

BPNTTRACK's hardware is covered under a 1-year warranty, ensuring that any defects or malfunctions are repaired or replaced at no additional cost.

Minor Faults and Free Video Call Support

For our 2-wired GPS system, minor faults that can be resolved at local garages are not charged, ensuring minimal downtime and cost-effective maintenance. Additionally, we offer free video call support, where our team guides you or local mechanics through quick fixes, making it easy to resolve issues without any extra cost.

Why Choose BPNTTRACK ?

Complete Diesel Monitoring :

Our system offers real-time data, 100ML theft detection, and 100% accurate refill alerts, giving you complete control over your fuel usage

1-Year Data History :

Access up to a full year's worth of data, providing detailed insights into diesel usage and vehicle performance.

Continuous Innovation :

We constantly upgrade our technology based on customer feedback and field experiences, ensuring you always have the most advanced solution
